From **requirement** to delivery.

AVO Global Services supports clients with complete supply solutions and technical advice during procurement. The company's profile emphasises strategic procurement to manage spending, strengthen supplier relationships, improve sourcing, and reduce avoidable operating costs.

SOURCE	Identify suitable products, suppliers and commercial opportunities.
SUPPLY	Coordinate the movement of required equipment, materials and products.
CONTROL	Support quality assurance and quality control throughout the process.
DELIVER	Coordinate project requirements toward the required destination.

Integrated solutions. One accountable partner.

01 Logistics & Supply Chain Management

Delivery coordination and supply-chain support for project requirements.

02 Procurement Source & Supply

Strategic sourcing and supply of products, equipment and materials.

03 Quality Assurance & Quality Control

Identification of non-conforming procedures or equipment and support for on-site correction.

04 Product Development

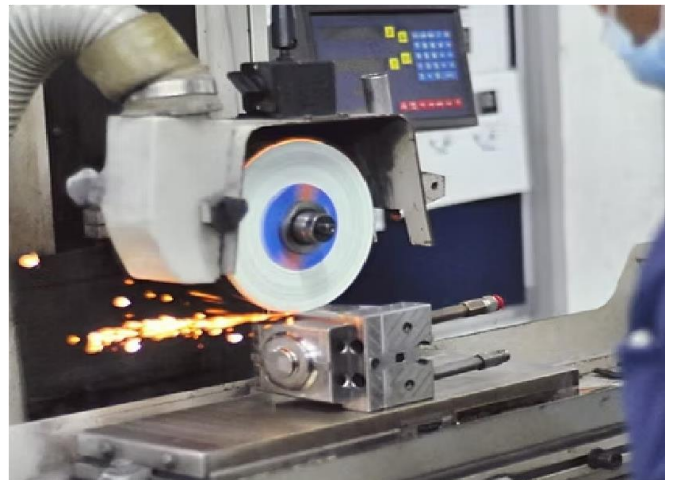

Support for product requirements and development within the supply process.

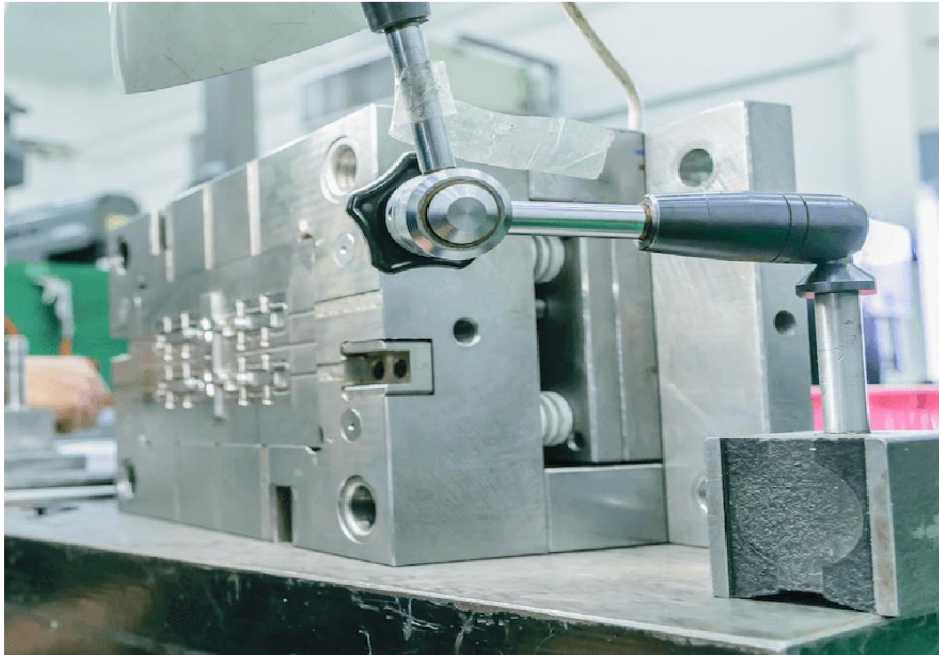

05 Project Management

Coordination of project requirements and execution from planning through delivery.

Powering industries for tomorrow.

AVO Global Services successfully supplies the Mining, Infrastructure, Engineering, Renewable Energy and Civil Infrastructure sectors.

INDUSTRIAL SUPPLY	EQUIPMENT & SPECIALIST SUPPLY
• Steel Products	• Prefabricated & Flatpack Housing
• HDPE & Irrigation	• Metal & CNC Machining
• Building Products	• Bearings
• Mineral Processing Equipment	• Plastic Injection Moulding
• Containers & Container Solutions	• Electrical
• Solar & Renewable Energy Products	• Heavy Equipment Spares
• Health & Safety Equipment (PPE)	• Grinding Media

Strategic sourcing. Measurable value.

AVO's profile explains procurement as a strategic function rather than simply finding suppliers, taking delivery and paying. The approach focuses on evaluating spending, identifying non-core activities, understanding supply risks and using resources to generate optimum value.

01 UNDERSTAND

Evaluate spend, specifications and project requirements.

02 SOURCE

Identify suppliers and opportunities for better commercial outcomes.

03 VALIDATE

Consider quality, legal exposure, commercial issues and supply assurance.

04 DELIVER

Coordinate sourcing, logistics and delivery performance.

05 IMPROVE

Build vendor relationships and pursue long-term cost efficiency.

Quality is not an afterthought.

The company profile highlights the identification of non-conforming procedures and equipment and real-time onsite correction. It also recognises factors such as personnel training, tight deadlines, limited inventory and pressure on profitability as contributors to quality risk.

Equipment conformity	Identify non-conforming equipment before it becomes a larger project issue.
Technical awareness	Apply industry knowledge and technical advice during procurement.
On-site correction	Support timely action when quality issues are identified.
Supply assurance	Reduce exposure to avoidable supply and delivery risks.

Supporting modern energy infrastructure.

Solar and renewable energy products are included in AVO's product portfolio, alongside electrical products and industrial equipment. This positions the company to support procurement requirements across conventional industrial environments and emerging energy infrastructure.

Renewable energy • Electrical supply • Industrial equipment • Project support

People. Partnership. Progress.

MISSION

To offer clients total cost savings and streamlined procurement solutions while maintaining close vendor relationships that support effective negotiation and commercial advantage.

VISION

By maintaining low overheads and a tightly connected company, AVO envisions becoming one of the top procurement houses in Africa.

CORE VALUES

Respect for customers; creativity, invention and innovation; honesty, integrity and business ethics; and compliance with applicable international laws.

OUR OPERATING PRINCIPLES

Integrity • Customer Respect • Innovation • Partnership • Compliance

Partners who keep business **moving.**
